

Paramont Series

Backing Up a Clip from The Paramont CMS Application 2026

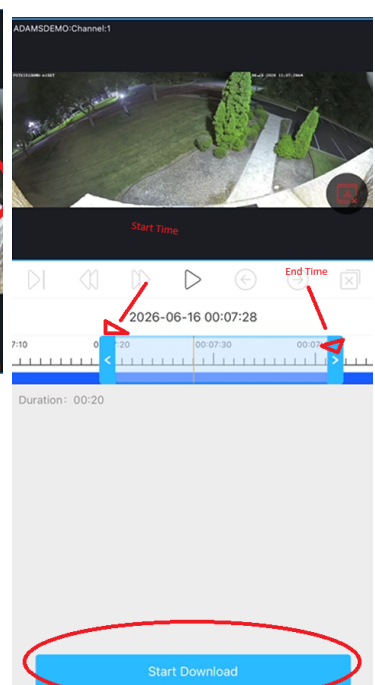

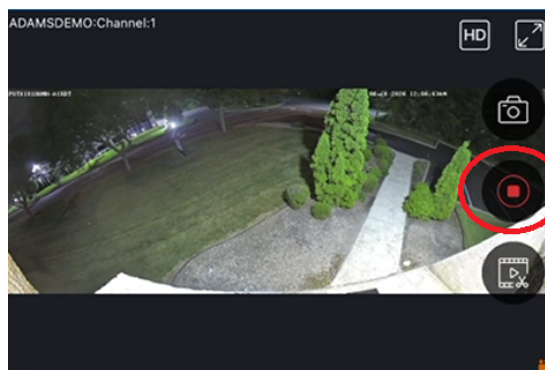

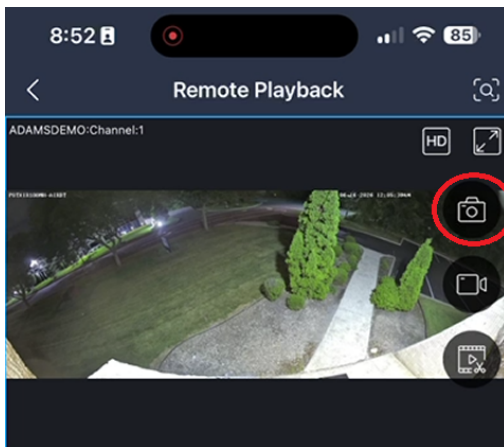

1. Select the Playback Icon, then select the date that you would like to view playback from.

2. Tap on the video in the middle of the screen to see the icons populate on the right-hand side to back up a clip.

3. You can select the camera icon to snap a screenshot of what you are currently viewing, you can hit the camcorder icon to do a live on screen recording of what you are viewing click the camcorder icon again to stop your live on screen recording, or you can click the scissors and play icon to utilize a start time and end time to back up a clip.

4. Once you have your snapshot or video clip downloaded go to the menu of the application and select file.

There you will see your snapshots and clips and can select the share icon to IE share via text, email, save to camera roll etcetera.
