

Paramont Series

How to Make Cameras High Quality on The Paramont Application

1. Select the camera you would like to view in high quality. Tap on the video feed and select “HD”
Select “Super Definition” for highest quality.

Middle Definition-D1(640X360)

Middle Definition1-D1(704X480)

High Definition-720(1280X720)

Full High Definition-1080P(1920X1080)

Super Definition

2. If you would like the quality to not change automatically, simply go to the menu for the application, select "local" and turn off "Resolution Adaption" *This feature automatically lowers the quality when on LTE service or a poor Wi-Fi connectivity when on
