INVID-AIR-B No Touch Exit Button is widely used in access control and security applications where on-demand passage opening control is required.

The unit's small size and stylish design extend installation options to narrow door trims or wall panels.

And its easy-to-see light indicator makes it easy to locate the button when the device is installed in poorly lit areas.

INVID-AIR-B provides efficient and convenient access control, minimizes false alarms, and ensures safe passage through doorways, making it an essential component in security and access control systems.
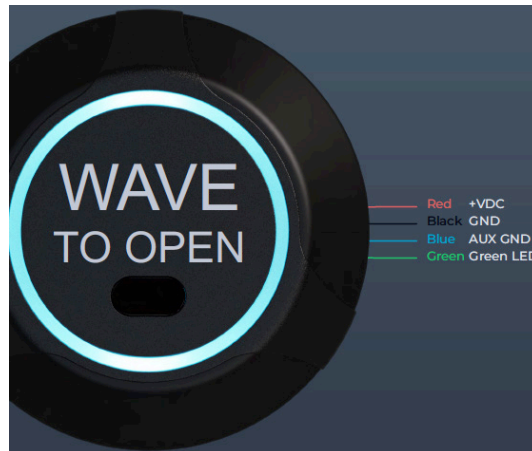

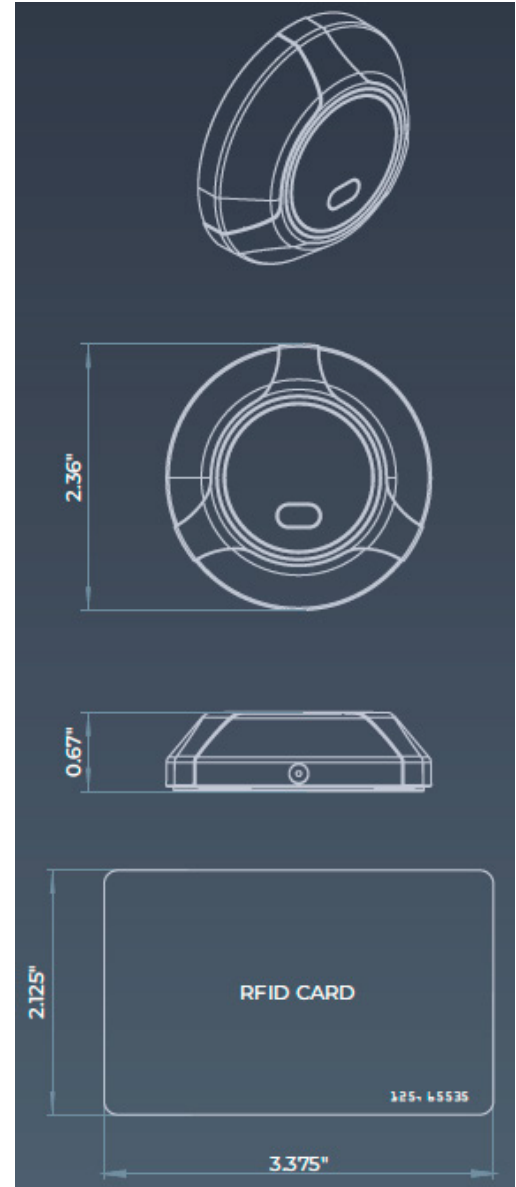

* Additional wires are required to connect the door.
