

INVID-ISSS-200W

Independent Solar Surveillance Solution. Off-grid Security Solution.

- New Full Metal Enclosures
- MPPT Charge Controller
- Withstand Extreme Weather Conditions
- Battery powered surveillance systems that utilize 100% renewable energy. Ready for rapid, remote deployment and automated operation.
- High-quality construction and components
- The universal mounting system is designed for quick and effortless installation on any existing square or round pole, accommodating poles up to ~16" in diameter or 16" square posts.
- The INVID-ISSS-200W comes with a bluetooth enabled battery charger (different from the optional INVID-GLOBALINK device) that can be accessed when it is in range (not remotely) and will give system information.

OPTIONAL Upgrade

INVID-GLOBALINK: InVid Global Link offers real-time solar charging and battery voltage and trends/historical data that can be accessed remotely (via phone, computer, or other device).
