

Defender Box Series — Built for the Field. In Stock Today.

The right enclosure for every job. Four models, one trusted line.

Shown with sample setup.
Accessories not included.

INVID-DDPB

Best for: Remote/standalone installs that need protected, alarm-controlled power distribution.

- 9 individual 12V output channels — powers a full camera run from one box
- 3 alarm-controlled outputs — trigger deterrence lights or relays from door/motion sensors
- Dual DC inputs (24V & 12V) support solar, battery, or grid power
- DC 48V & 24V outputs for PTZ cameras and accessories
- PTZ pendant mount, wall/pole brackets, and 4G antenna position included

INVID-DDPB2

Best for: High-power deployments requiring battery backup and a built-in PoE switch.

- Built-in 8-channel PoE+ switch — 30W/port, 240W total; no separate switch needed
- 24V/40Ah lithium battery backup with integrated cold-weather heater
- UPS signal output notifies the NVR on power failure for automatic response
- 360W PCM handles up to 1.5kW input — supports 110–277VAC commercial power
- Includes Sound AI PoE light siren as a standard deterrence accessory

INVID-DDPBMINI

Best for: Smaller 1–2 camera locations where a compact, protected housing is all that's needed.

- Lightest and most compact unit in the Defender line — easy single-person install
- Two built-in DIN rail power outlets for installer-supplied power supplies
- Built-in air breaker, surge protector, and thermal fan management
- Same mounting ecosystem as larger units — wall, pole, and PTZ pendant ready
- Ideal when the integrator wants a clean weatherproof enclosure without a built-in power system

VIS-8CHSMBOX

Best for: Remote sites needing an all-in-one enclosure with built-in NVR, PoE, and remote management.

- Built-in 8-channel NVR — records up to 16MP; supports up to 16TB HDD or 4TB SSD
- AI analytics on-board: face detection, vehicle detection, intrusion, people counting, and more
- Remote management via InVid Vision Live app and Vision CMS — restart ports, receive alerts, monitor health
- Automatic network restart — detects disconnections and power-cycles devices without a truck roll
- Built-in 8-port PoE switch (IEEE 802.3at/af), 4G router slot, and warning light pre-wired
- Camera mounting on all 4 sides; IP56 rated for permanent outdoor exposure
