

ONE ECOSYSTEM. BUILT TO SCALE.

PARAMONT SERIES

AI-Enabled IP & HD Analog Cameras, NVRs & DVRs

The Paramount Series delivers a comprehensive lineup of IP cameras and recording solutions built around powerful True AI analytics, exceptional image quality, and seamless scalability — from small businesses to large enterprise deployments. With a wide range of camera styles, resolutions, and AI-driven features, Paramount integrates effortlessly into a complete, intelligent security ecosystem.

- True AI human & vehicle classification: line crossing, intrusion detection, and more
- AccuSearch metadata search — locate footage quickly by appearance, vehicle type & more
- Camera portfolio spanning 2MP–12MP: turret, bullet, dome, LPR, PTZ, fisheye & specialty
- AI-triggered deterrence: flashing lights, audible siren, and white light color fill
- NVRs from 4–128 channels with face recognition and dual HDMI spot outputs
- DVR support for existing HD analog infrastructure — up to 8MP, 32 channels
- Plug & Play P2P connectivity for fast, simplified deployment

VISION SERIES

AI-Enabled IP Cameras & NVRs

The Vision Series brings advanced AI surveillance capabilities across a broad range of environments, offering high-performance IP cameras and scalable NVR solutions for integrators and end users who demand intelligent video without compromise. From deterrent-capable cameras to multi-site NVR deployments, Vision delivers the analytics and flexibility modern security demands.

- True AI classification: people, vehicles, line crossing, intrusion detection
- AccuSearch metadata search — locate footage quickly by appearance, vehicle type & more
- Camera range: 2MP–20MP across turret, bullet, dome, panoramic, LPR, thermal & specialty
- AIWLT deterrence: AI-triggered flashing lights and audible sirens
- Auto-tracking PTZ, full-color night imaging, People Counting & Heat Mapping
- NVRs from 4–128 channels with Smart Motion Detection (SMD)
- Dual HDMI outputs and independent spot monitoring on advanced models

CLOUD OPTIONS

Surveillance Beyond the Local Network

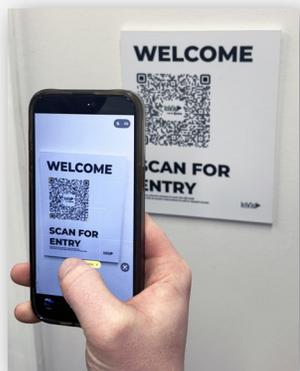

InVid Tech offers two distinct cloud solutions to extend any surveillance installation beyond the local network. Cloud Storage pairs existing on-premise equipment with secure cloud backup and AI analytics, while CloudView delivers a direct-to-cloud TAA-compliant option ideal for government and regulated industries — no local recording hardware required.

MONITORS & DISPLAYS

Purpose-Built for Surveillance

InVid Tech displays are engineered specifically for 24/7 security monitoring — available in HD, 4K, flush-mount, video wall, outdoor vandal-resistant, and digital signage configurations. PVM models with integrated 2MP cameras add an interactive layer to any monitoring station, and every display is designed to integrate seamlessly with InVid recording systems.

INVID-QR SMART INTERCOM

Modern Access, Zero Complexity

INVID-QR replaces traditional wired intercom panels with a cloud-managed QR code system — visitors scan with any smartphone to initiate a video call instantly, no app required. Authorized users answer and unlock doors remotely through a mobile app, making entry management simple, scalable, and virtually installation-free.

- No app required for visitors — any smartphone camera works
- Remote door unlock via mobile app and integrated web relays
- Cloud-managed for easy single or multi-site administration
- Flexible licensing: commercial (1:1) and residential (6:1) configurations
- Minimal installation — no complex wiring required
- Ideal for multi-family housing, offices, gated communities, and institutions

ACCESS CONTROL

Flexible Solutions for Every Door

InVid Tech's access control lineup covers wired and wireless credential management for any facility size — including the INVID-WIRELESSWIEGANDX, which eliminates cable runs entirely by creating a wireless Wiegand bridge between readers and controllers, making access control viable anywhere.

- Wired readers and controllers for single and multi-door deployments
- INVID-WIRELESSWIEGANDX: wireless Wiegand bridging — no cable runs required
- Supports proximity card, PIN, and multi-credential configurations
- INVID-QR integration for cloud-managed video intercom access
- Scalable from single-door to enterprise multi-site deployments
- Seamless integration with InVid cameras and recording systems

ELECTRONIC LOCKERS

Smart Storage, Fully Customized

Every InVid Tech locker is purpose-built to spec — configured for the exact size, layout, finish, and access method the application demands. The cloud-managed platform delivers real-time inventory tracking, remote unlock, and full audit trails accessible from any mobile device.

- Fully customizable: size, compartments, finish, and access method
- Cloud-managed with real-time inventory tracking and audit trails
- Remote unlock and monitoring — no dedicated app required for end users
- Cellular connectivity for flexible deployment anywhere
- Supports package pickup, tool vending, inventory control, and retail fulfillment
- Scalable across multiple locations from a single management portal

SOLAR SURVEILLANCE

Off-Grid Security Without Compromise

InVid Tech solar solutions bring professional surveillance to locations without traditional power infrastructure — combining modular solar kits and a deployable mobile trailer with the full AI capabilities of the Paramount camera lineup, fully customizable for any site requirement.

- Solar kits available in single-panel (180W) and dual-panel (360W) configurations
- Up to 2560Wh battery capacity with integrated PoE to power cameras directly
- Mobile Solar Trailer for rapid, relocatable deployments
- Cellular router integration for remote connectivity
- Compatible with the full Paramount camera lineup — fully customizable per site
- Ideal for construction sites, parking areas, remote facilities, and temporary deployments

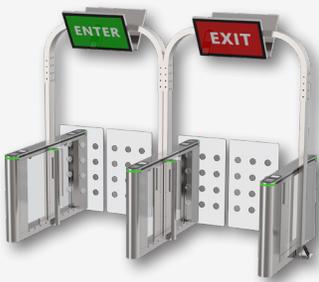

DEFENDER BOX ENCLOSURES

Rugged Protection for Any Environment

Defender Box enclosures are weatherproof, purpose-built housings designed to protect surveillance equipment in demanding outdoor and remote locations — from compact single-camera installs to fully integrated systems with built-in power management, PoE switching, and battery backup.

- Weatherproof enclosures for remote and outdoor deployments
- Models range from compact DIY-flexible to fully integrated multi-camera systems
- Built-in PoE switching and power control modules on select units
- Battery backup for uninterrupted operation
- VIS-8CHSMBBOX option with integrated NVR and Smart Management Server

TURNSTILES

Intelligent Access at the Entry Point

InVid Tech turnstiles combine high-quality physical barriers with camera and software integration to create intelligent, fully managed entry control checkpoints — available in a range of form factors from sleek waist-high units to full-height climb-proof models for maximum security.

- Form factors: tripod, swing gate, waist-high, and full-height climb-proof
- Premium stainless steel and aluminum alloy construction
- Supports facial recognition, IC/ID card, QR code, and fingerprint access
- Integrated digital signage capability on select models
- Fast Lobby software integration for complete visitor management
- Direct integration with InVid facial recognition cameras
- Code-compliant wiring separation for clean professional installation

AI-POWERED SURVEILLANCE. SCALABLE SOLUTIONS. U.S.-BASED SUPPORT.
