

THE INVID-QR SOLUTION

A secure, cloud-managed QR code intercom system that replaces wiring, kiosks, and physical badges.

INVID-QR: Smart Intercom & QR Code Access System

InVid Tech — Powered by Entrio

A modern, app-free, hardware-light access solution for multi-family, gated communities, offices, schools, and mixed-use buildings. **Visitors simply scan, select, and connect — no apps for visitors, no keypads, no kiosks.**

WHY INVID-QR?

- Fast install: minimal wiring
- App-free visitor experience with optional custom logo branding
- 30-day cloud event history + centralized management

Seamless Add-On to Any Access Control System

INVID-QR runs alongside your existing access control — no changes to badges, panels, or card readers required. It simply adds a secure QR-based visitor calling option, with optional door unlock when used with a web relay.

THE PROBLEM WITH TRADITIONAL INTERCOMS

- High wiring and installation costs
- Outdated hardware prone to failures and limited features
- Manual visitor logs and inefficient check-in processes
- Requires full-time security/reception oversight

How Visitor Access Works

- 1. Scan QR Code –**
Visitor scans the plate with their phone.
- 2. Select Contact/Reception –**
A secure webpage opens with the directory.
- 3. Video Call –**
Resident/staff receives a mobile notification.
- 4. Two-Way Communication –**
Live audio/video conversation.
- 5. Optional: Remote Unlock –**
With relay hardware.

Two Ways to Unlock

- Mobile Unlock
- Expiring Guest PINs

Commercial License (1:1)

One licensed user per person. Ideal for offices, front desks, and individual employee contacts.

Commercial licensing begins with a 10-user starter pack; additional users can be added with individual licenses or additional 10-packs.

Residential License (6:1)

One licensed unit with up to six residents. Ideal for apartments, families, and multi-tenant housing.

Example: A 4–6 person apartment = one residential license.

QR Codes

Each INVID-QR system includes one QR code. Licenses do not add per-door fees.

Additional QR codes for calling can be issued at no charge based on your licensed users or units.

**Door unlocking requires a web relay.
Calling functionality does not.**

Ready to modernize your visitor access?

Scan. Call. Connect — with INVID-QR.
