PARAMONT •

IP & HD Analog Security Surveillance Solutions

The InVid Tech Paramont Series delivers a comprehensive range of IP and HD Analog security products, designed to secure any application with reliability and advanced technology. Whether for residential, commercial, or industrial settings, the Paramont Series meets the demands of modern security environments.

NDAA-Compliant Product Options

InVid Tech provides an extensive selection of NDAA-compliant cameras and recorders to help customers meet strict federal compliance standards. These devices offer robust, trustworthy solutions for government and enterprise applications requiring adherence to the NDAA guidelines.

Illuminate Color at Night

With InVid Illuminate technology, our cameras achieve full-color imaging around the clock without the need for white lights or infrared LEDs. These advanced cameras harness ambient light sources like street lights, house lights, or even moonlight, ensuring vivid color reproduction even in the darkest conditions. Illuminate is the perfect solution for customers who need 24/7 visibility without compromising image quality.

Cloud Storage for Flexible Backup Solutions

InVid Tech offers flexible cloud storage options to suit diverse video surveillance needs. Choose from storage durations that range from a single week to as long as three years, providing secure video backup and redundancy that scales with your requirements.

True AI-Powered Human & Vehicle Detection

Our cameras are equipped with advanced AI technology, allowing for intelligent detection of human and vehicle movements. Featuring capabilities like line crossing and intrusion detection, InVid Tech AI cameras can be customized to trigger recording when specific boundaries are crossed. Unlike standard systems, these cameras only activate when detecting a human or vehicle, reducing false alarms and enhancing security accuracy.

License Plate and Facial Recognition with Instant Alerts

For high-level security applications, InVid Tech's cameras offer License Plate Recognition (LPR) and Facial Recognition technologies. These systems provide real-time alerts, notifying you immediately upon recognition of predefined license plates or faces, ensuring timely and actionable security responses.

Specialty Security Solutions

Our product lineup also includes specialty cameras designed for unique security applications. Options include cameras with built-in strobes, sirens, two-way microphones, and other specialized features, providing versatile solutions to meet the most specific security requirements.
