

## **Vision Series**

Setting up email notifications for the Vision Series with Yahoo

\*\*This guide will be utilizing the web GUI the only difference between here and the local monitor will be accessing main menu on the local monitor. You right click on the mouse button and click Main Menu, Network, Basic, Email across the top\*\*

1. Select Setup, Network/Email and input your SMTP information

\*\*Our email notifications system has been tested with Gmail and Yahoo so that is InVid's recommendation. Outlook does work, it requires port 587 and TLS, but you will need to ensure no firewall or security settings are blocking the sending, InVid Tech cannot troubleshoot.

Have Questions7 (800) 760-1284	Your app password
	Your one-time app password for <b>InVid Tech</b> is:
	ACCOL
	How This is a one-time password ~ you do not need to remember it. It does not replace your normal password.
	How to use this password 1. Sign into the app/service using your normal username
	2. Instead of your normal password, enter the app password above
	If you stop using InVid Tech, you can delete the app password here to remove InVid Tech's access to your account.
	This is Done
	Pass

4. Take your generated password and input this password into the "Password" field under Network/Email.

## 5. Test to Confirm

6. Defining email notifications. This photo below shows how to turn on for Motion, however you can turn on for most alarms, i.e. Motion, AI events, Video Loss and Exceptions

Client	~	Motion
