

# Enterprise Solutions

FOR EVERY INDUSTRY

## Video Wall

If your application has many cameras or you want to view a large area in great detail, sometimes a single monitor will not cut it. InVid Tech offers video wall options that grow with your needs. Typical sizes are 2x2, 4x4, 8x8, and 16x6, but we can do whatever size you need.

## Thermal Cameras

Advanced camera technologies include thermal detection. We offer specialty cameras that can detect heat, fire, and smoking. These cameras offer smoker detection using the thermal lens based on the heat signature. The thermal lens also will detect humans and vehicles. Are you looking for smoke or flame detection? The visible lens runs an AI algorithm that looks for smoke and flames. These advanced cameras can alert you to an issue before it becomes a problem.

## Vape Detection: IoT

Surveillance has moved past just a traditional security camera system. Everyone is looking for intelligent systems that connect to the cloud so everything can be monitored, & vaping is no exception. It's time to add smart surveillance to your system.

## Access Control

Access Control that is Easy to Connect, from a single door unit to a limitless number of connections. It is an excellent choice for both new and the replacement of existing systems.

The network access controller allows controlled access to buildings with electromagnetic or electromechanical locks. It also automates vehicle passage, keeps time and attendance hours, and much more.

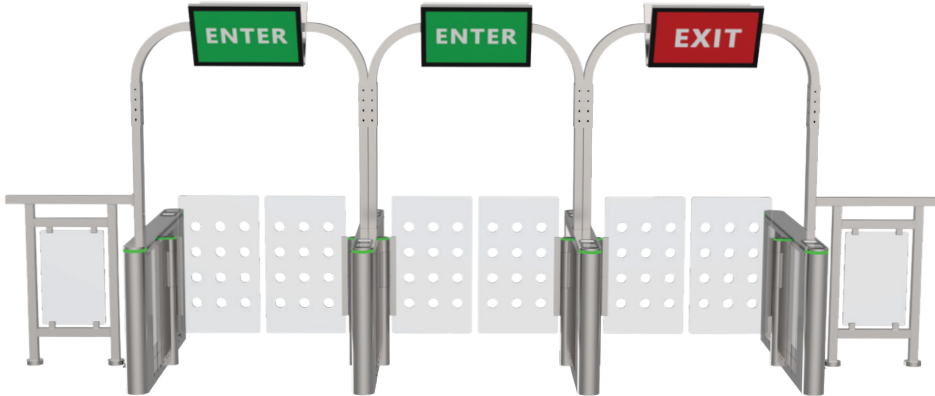

The Universal Wireless Wiegand is a Point-to-Point Bridge Device that connects peripheral devices such as readers, electric locks, door position sensors, and exit buttons to the access control controller unit, thousands of feet away without running communication cables.

## LPR

License Plate Recognition (LPR) Cameras are specialized cameras that capture a license plate. When combined with software, they allow you to capture, search for, and save vehicle information. You can easily search for license plates by entering a single letter or number and watch clips of the vehicle leaving or entering.

# Enterprise Solutions for Every Application

## Turnstiles

The turnstile's modular design allows it to be easily shipped and installed using standard hand tools. The no-core drill solution allows for a divided frame with low voltage on one side and high voltage on the other, per electrical code.

Incorporate different turnstile options, digital signage for info, advertising, emergency notifications, and other advanced features like people counting and facial recognition with integrated cameras.

## Solar

InVid Tech has your Solar Surveillance needs covered. We offer Mobile Trailers, Fixed Pole Mount Units, Single Camera Units, Power Banks, and many more customizable options for your application. These units are designed for tough conditions and durability.

When you choose a mobile surveillance option, these systems can be quickly deployed and moved around, making them perfect for construction and other companies that require mobile on-site surveillance. Mobile surveillance supports existing security infrastructure by providing new surveillance angles and detecting intruder movements in real-time. Powered by a durable battery, the mobile solar outdoor surveillance can last for days in low sunlight.

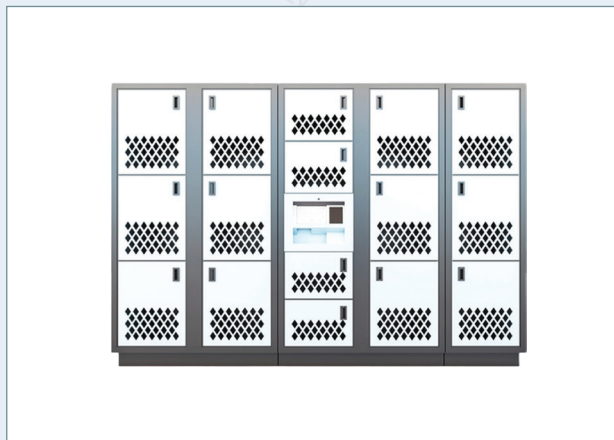

Many various options, functions, and features are available no matter which solar option you choose.

# The world wants to feel safe. InVid Tech offers products to Alert, Connect, and Secure You.

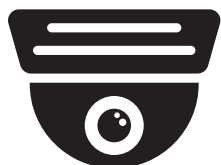

## Command Centers

InVid Tech Command Centers are easily customizable and feature integrated monitor mounting, wire management, and more. They offer organized surveillance monitoring and can even accommodate a video wall setup.

## Lockers

InVid Tech Lockers are customizable to your needs. You can select the size, quantity, style, and more. Designed to be used with a customer's mobile device, the lockers are easily accessible and offer a wide range of applications.
